WEB DEVELOPER

Web Developer with 1 year of hands-on experience building dynamic and responsive websites using PHP/Laravel, and JavaScript. Skilled in developing CMS-based applications with Filament, writing clean and maintainable code, and solving problems efficiently. Strong team player with a passion for innovation and continuous learning. Committed to delivering high-quality, scalable solutions in collaborative environments.

STRENGTHS AND EXPERTISE

Strong problem-solving skills with a practical approach to debugging and feature development

Fast learner, eager to adopt new tools and technologies

Collaborative team player with effective communication skills

Passionate about innovation and continuous improvement

EDUCATION

Certificates

- Fairway Technonlogy (Programming Basic Course ,Professional Web Developer Course)
- A Programmer (Extensive PHP Course, Web Development With Laravel Course)
- Myanmar Pyi Online Class (Computer A+)

Pyay University

- B.A (English)

Yankin Education College

- DTed (17/12)

Language Proficiency

- English Intermediate
-

TECHNICAL SKILLS

Languages : PHP / Javascript

Frameworks,Libraries & Package : Laravel, Vue, React, Filament, Tailwind, Bootstrap, JQuery, Next Js

Tools : Git, Github, Postman

Databases: MySQL, MongoDB, Sqlite

PROFESSIONAL EXPERIENCE

Minn Shin Saw Company Ltd.,

January 2025 - Present

Junior Web Developer

As a Junior Web Developer, I have contributed to the full development cycle of three CMS-based websites using Laravel and Filament. I built responsive, user-friendly interfaces and feature-rich admin panels tailored to each project's requirements. My first project, Siam Lotus, included a card-based layout and a reservation system, leveraging Filament for streamlined backend management. For the Tharabha website, I gained valuable experience implementing a custom booking calendar, multi-step forms, role-based access control, and Laravel's mailing system. The third project, Brainfit, an international school website, involved responsive UI design, mailing integration, and a robust admin panel. I also developed APIs to support mobile app functionality. Currently, I'm working on the EduPlus project, collaborating with senior developers to maintain and enhance the platform, ensuring high code quality and reliable feature delivery.

Accomplishments:

- Developed and launched three CMS websites using Laravel and Filament, each with fully responsive designs and feature-rich admin panels.
- Built a reservation system and dynamic card layout for the Siam Lotus website, improving user engagement and backend efficiency.
- Designed and implemented a custom booking calendar, multi-step forms, and role-based permissions for the Tharabha project, gaining hands-on experience with complex Laravel features.
- Integrated Laravel's mailing system for contact forms and booking notifications across multiple projects, improving communication flow and reliability.
- Delivered a polished, professional web presence for Brainfit, an international school, with responsive UI and a scalable admin panel.
- Developed secure RESTful APIs to support mobile app functionality, ensuring seamless integration between backend and frontend systems.
- Collaborated with senior developers on the EduPlus project, contributing new features, improving performance, and maintaining code quality in a production environment.
- Actively participated in code reviews, debugging, and optimizing database queries for better application performance.
- Managed responsibilities independently, meeting deadlines while learning new technologies and frameworks quickly.

On Job Training Developer

During my on-the-job training, I focused on learning Laravel Filament and understanding full project development workflows under the guidance of senior developers. I gained hands-on experience in separating reusable Blade components and implementing responsive design practices for modern web applications.

Accomplishments:

- **Pyi Htar Kyaw Work Agency Website:** Built using Laravel with a Filament-based admin panel. I was involved in designing and implementing both frontend and backend features to manage job listings and agency operations.
- **MerryMarry Project:** Collaborated with senior developers to contribute to both frontend and backend development. My responsibilities included coding interface components, connecting APIs, and ensuring functionality aligned with project requirements.

This experience strengthened my skills in Laravel, Filament, responsive UI design, and teamwork in a real-world development environment.
